HOW WE HELP OUR HEROES

The iBOT® is **FULLY COVERED** for qualified veterans under the VA Federal Supply Schedule (FSS #36F79721D0202). Mobius Mobility can work with a Service Officer of choice to help guide them through the process of obtaining an iBOT® through the VA.

Veterans may also receive an iBOT® through community care or support from nonprofit organizations.

The iBOT® was created with veterans in mind. In 2021, Team iBOT® donated and personally delivered 50 iBOT®s to both VA Spinal Cord Injury & Disorder centers and veterans across the country.

iBOT® IS PROUDLY ALL-AMERICAN

Located in the historic Amoskeag Millyard of Manchester, New Hampshire, Mobius Mobility manufactures, services, supports, and trains ***entirely*** in the United States.

Mobius Mobility is proud to be a Platinum Veteran-Friendly Company in the state of New Hampshire!

ELEVATE YOUR GAME: The Multi-Modal iBOT®

The iBOT® has been known only as the stair-climbing wheelchair. This may be true, but it's so much more!

A MODE FOR ANYTHING
Six modes all in one device, including the unique-to-iBOT® Balance Mode

TRANSPORTABLE
Remote mode allows an unoccupied iBOT® to climb into a vehicle, up to 20° ramps

TERRAIN FOLLOWING
Terrain-following technology helps users stay level while going up and down inclines.

LITHIUM-ION TECH
Lightweight batteries for greater efficiency and extended life

KEEP THE DIRT OUT
The iBOT®'s closed design allows for easy cleaning with a garden hose

VARIED TERRAIN
Conquer sand, snow, grass, gravel, curbs, then drive inside

SOLUTION FOR FLATS
Tire rotation technique allows for continued driving until a flat is repaired

FEATHERWEIGHT
Lightweight powerbase only weighs 175 pounds.

ADDITIONAL OPTIONS

- **Range Extender Batteries** for enhanced mileage per charge.
- **Occupied Transport** allows iBOT® users to drive and ride in a car from their device.
- **X-TREME Wheels** are specifically designed for tough terrain.
- **Lighting Packages** are available to illuminate your way.

FINDING FREEDOM with iBOT®

ROAD MAP TO INDEPENDENCE

STEPS TO ACQUIRE AN iBOT® THROUGH VA HEALTHCARE SYSTEM

The iBOT® is available to qualified veterans enrolled in the VA Healthcare System at no charge under the Federal Supply Schedule.

1. REQUEST APPOINTMENT

Request an appointment with your Primary Care Physician or PM&R to be evaluated for a power mobility device.

Prior to your appointment, review "Why iBOT®?" information on our website at **mobiusmobility.com/why-ibot**.

2. WHEELCHAIR CLINIC EVALUATION

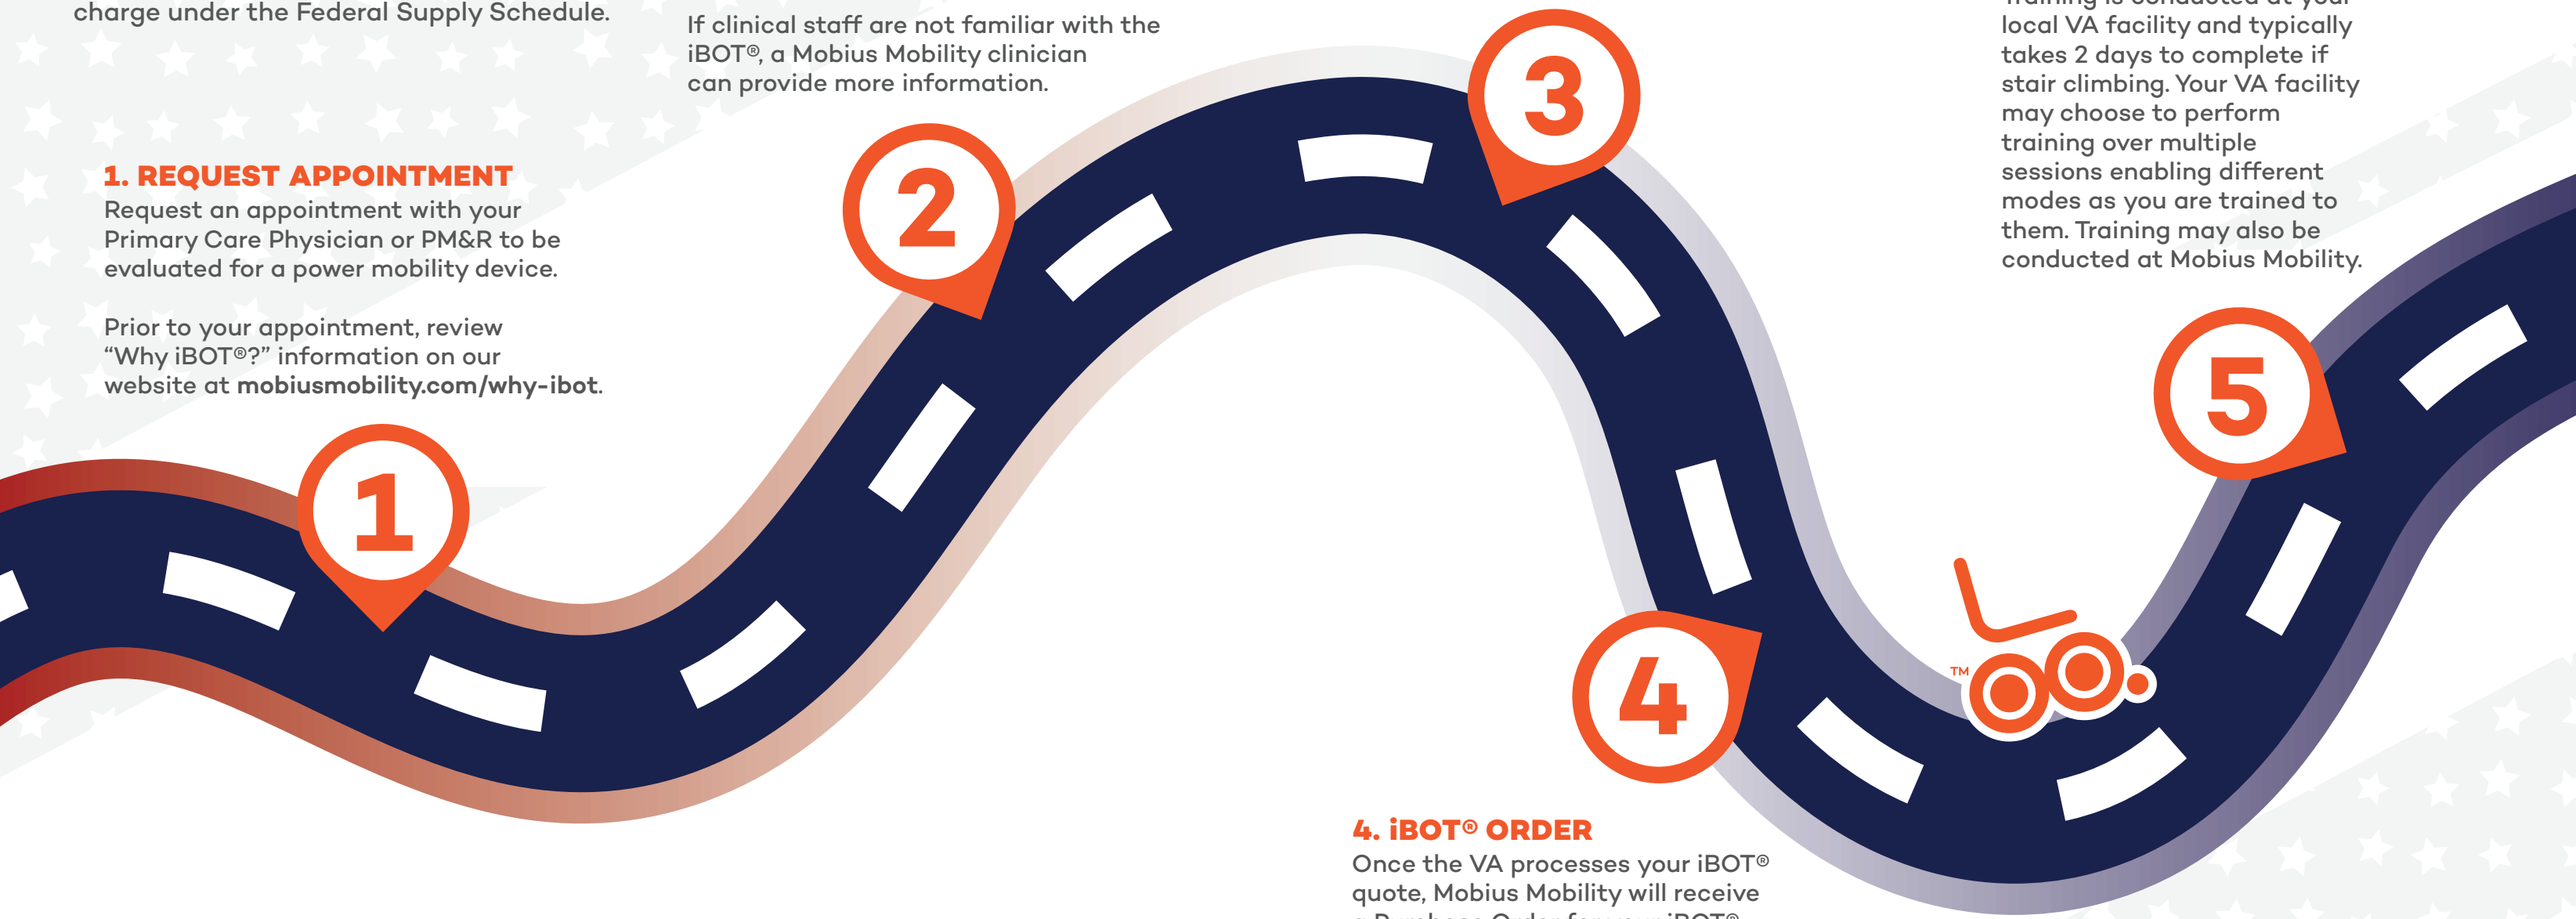
In your evaluation, ask about the iBOT® and explain why your current mobility devices are not meeting your needs. Arrive prepared with printed copies of iBOT® Prescription Template and Patient Assessment forms, available online at **mobiusmobility.com/form-page**.

If clinical staff are not familiar with the iBOT®, a Mobius Mobility clinician can provide more information.

3. iBOT® RECOMMENDATIONS

If your clinical team has determined an iBOT® is appropriate for you, they will forward the required seating configuration to Mobius Mobility.

If at any point it is determined the iBOT® is not appropriate for you, ask to receive a written letter of denial describing the reason(s) why. Depending on reason(s), you may have an opportunity to appeal the denial with the assistance of a Veteran's Service Officer.



4. iBOT® ORDER

Once the VA processes your iBOT® quote, Mobius Mobility will receive a Purchase Order for your iBOT®. The VA will schedule your training dates in coordination with the delivery of your iBOT®.

5. iBOT® TRAINING

Training is conducted at your local VA facility and typically takes 2 days to complete if stair climbing. Your VA facility may choose to perform training over multiple sessions enabling different modes as you are trained to them. Training may also be conducted at Mobius Mobility.
